Work Experience

DATES	November 2014 - Present
COMPANY	AppKnox
WEBSITE	https://www.appknox.com/
RESPONSIBILITIES	At AppKnox, I am responsible for architecting the entire product from ground-up, deploying it and ensuring the reliability & scalability of the site.

DATES	June 2014 - October 2014
COMPANY	GAWMiners
WEBSITE	gawminers.com
RESPONSIBILITIES	I played around with CGMiner scripts to add new APIs to access and modify BitCoin mining pools by IDs, built a BTC/LTC/XDG payment gateway for Shopify, contributed to ZenCloud every now and then and done few other stuff. It is awesome working at GAW Miners.

DATES	June 2013 - April 2014
COMPANY	LaunchYard
WEBSITE	http://launchyard.com/
RESPONSIBILITIES	I worked on almost half a dozen of startups while I was at LauchYard. I did everything from Architecting, Coding, DevOps and Scaling both front-end and back-

end. I learned how to decouple Front-end completely from Back-end too. I also got to train some of my colleagues. Awesome place to work in. I totally loved working there. I learned some important lessons there too. I wanted to build something on my own, so I left LY.

DATES	Jan 2012 - Feb 2013
COMPANY	Tataatsu
WEBSITE	http://tataatsu.com
RESPONSIBILITIES	While I was at Tataatsu, I worked in ReWire and CollabLayer. Most of my work was on writing back-end for CollabLayer and write ReWire(a Native iOS app). I was also responsible for writing parts of CollabLayer iOS app - Mostly the parts where it interacted with the server APIs.
